However, efforts to create a more dynamic, open, and competitive economy have fallen short of expectations, and the economy still faces important challenges. Investment, particularly foreign direct investment, is held back by a difficult business environment, while large numbers of worker seek job opportunities abroad as economic growth is too low for incomes to noticeably close the gap with regional peers. Reserves have recovered, but remain relatively low, while the economy is still vulnerable to shocks.</p>	<p>IMF Country Report</p>
